**Alpha Fetoprotein Ab-2**

Rabbit Polyclonal Antibody  
Cat. #DLN-12913, or DLN-12912 (0.5ml, or 1.0ml)  
Cat. #DLN-12914 (7.0ml) (Ready-to-Use for Immunohistochemical Staining)

**Description:** AFP is normally synthesized in the liver, intestinal tract, and yolk sac of the fetus. Antibody to AFP has been shown to be useful in detecting hepatocellular carcinomas (HCC) and germ cell neoplasms, especially yolk sac tumors.

**Comments:** Ab-2 is highly specific to AFP. It is excellent for immunohistochemical staining of formalin-fixed, paraffin-embedded tissues.

**Mol. Wt. of Antigen:** 70kDa

**Epitope:** Not determined

**Species Reactivity:** Human, Pig, and Sheep. Does not react with dog. Others-not known.

**Immunogen:** Purified alpha fetoprotein

**Applications and Suggested Dilutions:**
- Western Blotting (Ab 1:100 for 2hrs at RT)
- Immunohistology (Formalin/paraffin)  
  (Ab 1:100-1:200 for 30 min at RT)  
  * [No special pretreatment is required for the immunohistochemical staining of formalin/paraffin tissues.]

The optimal dilution for a specific application should be determined by the investigator.

**Positive Control:** HEP-G-2 cells. Fetal liver or hepatocellular carcinoma.

**Cellular Localization:** Cytoplasmic

**Supplied As:**  
Immunoglobulin fraction from rabbit anti-serum. Prepared in 10mM PBS, pH 7.4, with 0.2% BSA and 0.09% sodium azide.

or

Prediluted antibody which is ready-to-use for staining of formalin-fixed, paraffin-embedded tissues.

**Storage and Stability:**  
Store vial at 4°C. When stored at 2-8°C, this antibody is stable for 24 months.

Limitations and Warranty:
Our products are intended FOR RESEARCH USE ONLY and are not approved for clinical diagnosis, drug use or therapeutic procedures. No products are to be construed as a recommendation for use in violation of any patents. We make no representations, warranties or assurances as to the accuracy or completeness of information provided on our data sheets and website. Our warranty is limited to the actual price paid for the product. Dianova is not liable for any property damage, personal injury, time or effort or economic loss caused by our products.

Material Safety Data:
This product is not licensed or approved for administration to humans or to animals other than the experimental animals. Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. Appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. The material contains 0.09% sodium azide as a preservative. Although the quantity of azide is very small, appropriate care should be taken when handling this material as indicated above. The National Institute of Occupational Safety and Health has issued a bulletin citing the potential explosion hazard due to the reaction of sodium azide with copper, lead, brass, or solder in the plumbing systems. Sodium azide forms hydrazoic acid in acidic conditions and should be discarded in a large volume of running water to avoid deposits forming in metal drainage pipes.
