

Rabbit Antiserum anti-Chicken IgG (F(ab')2)-unconj., MinX none

General Information

Catalog Number: SEC-182418 Physical State: Lyophilized Quantity: 2 ml Reconstitution Volume: 2.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent) Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Expiration date is one (1) year from date of opening. Antibody Host / Format Format Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Clonality / Isotype / Clone: 90 mg/mL by Refractometry Specificity Concentration: 90 mg/mL by Refractometry Specificity Immunogen: Chicken IgG F(ab')2 fragment Antibody Specificity: IgG (F(ab')2 This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Chicken IgG F(ab')2 Formulation, Transport and Storage Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as ar undiluted liquid. Dilute only prior to immediate use. Storage Temperature: 0.01% (w/v) Sodium Azide						
Reconstitution Buffer: Restore with deionized water (or equivalent) Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Expiration date is one (1) year from date of opening. Antibody Format: Rabbit Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Concentration: 90 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity IgG (F(ab')2 Fragment) Fragment) This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Chicken IgG (Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F	Catalog Number: SEC-182418	Physical State:	Lyophilized			
Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Host Species: Rabbit Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Concentration: 90 mg/mL by Refractometry Origination: Specificity Immunogen: Chicken IgG F(ab')2 fragment Maximum Excitation / Emission: / Specificity: IgG (F(ab')2 This product was prepared from monospecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(ab')2 and Chicken Serum. No reaction was observed against Chicken IgG F(c). Formulation, Transport and Storage Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as ar undiluted liquid. Dilute only prior to immediate use.	Quantity: 2 ml	Reconstitution Volume:	2.0 mL

Product Datasheet / Instruction for use

Application Note:

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.

Background Information

Anti-Chicken IgG F(ab')2 Antibody generated in rabbit is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme pepsin under controlled conditions of temperature, time and pH. F(ab')2 molecules lack the Fc portion of IgG and therefore receptors that bind Chicken IgG F(c) will not bind Chicken IgG F(ab')2 molecules.

Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
