

Rabbit Antiserum anti-Guinea Pig IgG (H+L)-unconj., MinX none

General Information

Catalog Number: SEC-182430 Physical State: Lyophilized Quantity: 2 ml Reconstitution Volume: 2.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent) Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Concentration: 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity: Specificity: IgG (H+L) Immunogen: Guinea Pig IgG whole molecule This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Store vial at 4* C prior to restoration. For extended storage aliquot contents and freeze at -20* C or below. Avoid cycles of freezing and thawing. Centrifue product if not completely clear after standing at thawing. Centrifue product is not beneral weeks at 4* C as an undiluted liquid. Dilute only prior to immediate use. Storage Temperatures: 0.01% (w/v) Sodium Azide Yestervatives: 0.01% (w/v) Sodium Azide						
Reconstitution Buffer: Restore with deionized water (or equivalent) Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Clonality / Isotype / Clone: polyclonal Ig Maximum Excitation : 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity Specificity: IgG (H+L) Target Species: Guinea Pig Immunogen: Guinea Pig IgG whole molecule Antibody Specificity: IgG (H+L) This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Store vial at 4* C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4* C as an undiluted liquid. Dilute only prior to immediate use. Storage Temperature: 4.8*C	Catalog Number: SEC-182430	Physical State:	Lyophilized			
Shipping Conditions: at room temperature Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Host Species: Rabbit Antibody Format: Antiserum Concentration: 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity: Specificity: IgG (H+L) Target Species: Guinea Pig Antibody Specificity: IgG (H+L) This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Minimal Cross Reactivity: none Formulation, Transport and Storage Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as ar undiluted liquid. Dilute only prior to immediate use. Storage Temperature: 4.8°C	Quantity: 2 ml	Reconstitution Volume:	2.0 mL			
Product Expiration Expiration date is one (1) year from date of opening. Antibody Host / Format Host Species: Rabbit Host Species: Rabbit Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Concentration: 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity Target Species: Guinea Pig Antibody Specificity: IgG (H+L) This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Storage Buffer: 0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: None Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product is table for several weeks at 4° C as at undiluted liquid. Dilute only prior to immediate use. Storage Temperature: 4-8°C		Reconstitution Buffer:	Restore with deionized water (or equivalent)			
Antibody Host / Format Host Species: Rabbit Antibody Format: Antiserum Concentration: 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity Target Species: Guinea Pig Antibody Specificity: IgG (H+L) Immunogen: Guinea Pig IgG whole molecule This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Formulation, Transport and Storage Storage Buffer: 0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: None Preservatives: 0.01% (w/v) Sodium Azide		Shipping Conditions:	at room temperature			
Host Species: Rabbit Clonality / Isotype / Clone: polyclonal Ig Antibody Format: Antiserum Concentration: 70 mg/mL by Refractometry Conjugation: unconjugated Maximum Excitation / Emission: / Specificity Target Species: Guinea Pig Antibody Specificity: IgG (H+L) This product was prepared from monospecific antiserum by a delipidati and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Guinea Pig IgG and Guinea Pig Serum. Minimal Cross Reactivity: none Formulation, Transport and Storage Storage Buffer: 0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: None Preservatives: 0.01% (w/v) Sodium Azide		Product Expiration

Product Datasheet / Instruction for use

Application Note:

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.

Background Information

Anti-Guinea Pig IgG Antibody generated in rabbit detects guinea pig IgG. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both heavy and light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
