

Product Datasheet / Instruction for use

Rabbit IgG anti-Cat IgG (H+L)-unconj., MinX none

General Information

Catalog Number: SEC-182496	Physical State:	Lyophilized		
Quantity: 50 mg	Reconstitution Volume:	5.0 mL		
	Reconstitution Buffer:	Restore with deionized water (or equivalent)		
	Shipping Conditions:	at room temperature		
	Product Expiration	Expiration date is one (1) year from date of opening.		
Antibody Host / Format	I			
Host Species: Rabbit	Clonality / Isotype / Clon	Clonality / Isotype / Clone: polyclonal Ig		
Antibody Format: IgG whole molecule	Concentration:	10.0 mg/mL by UV absorbance at 280 nm		
	Conjugation:	unconjugated		
	Maximum Excitation / Emission: /			
Specificity				
Target Species: Cat	Immunogen:	Immunogen: Cat IgG whole molecule		
Antibody Specificity: IgG (H+L)	This product is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophores resulted in a single precipitin arc against anti-Rabbit Serum, Cat IgG and Cat Serum.			
	Minimal Cross Reactivity	: none		
Formulation, Transport and Storage	Minimal Cross Reactivity	: none		
Formulation, Transport and StorageStorage Buffer:0.01 M Sodium Phosphate,0.15 M Sodium Chloride, pH 7.2Stabilizer:NonePreservatives:None	Store vial at 4° C prior to contents and freeze at -2 thawing. Product Datasheet / Instruction for use

Dilution: ELISA 1:20.000 - 1:100.000, Immunohistochemistry (IHC) 1:1,000 - 1:5,000, Western Blot (WB) 1:2.000 -1:10.000

Application Note:

Anti-Cat IgG antibody is suitable for ELISA, western blot, and immunohistochemistry, as well as other assays requiring lot-tolot consistency.

Background Information

Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition. Anti-Cat IgG (H&L) antibody is ideal for investigators in Immunology, Cancer, and Microbiology research.

Safety Information

The product contains no hazardous constituents. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
