

Product Datasheet / Instruction for use

Goat IgG anti-Mouse IgG3 (Fc)-ATTO 488, MinX none

General Information

Catalog Number: SE	C-183193	Physical State:	Lyophilized		
Quantity:	0,5 mg	Reconstitution Volume:	500 μL		
		Reconstitution Buffer:	Restore with deionized water (or equivalent)		
		Shipping Conditions:	at room temperature		
		Product Expiration	Expiration date is one (1) year from date of opening.		
Antibody Host / Form	nat				
Host Species: Go	pat	Clonality / Isotype / Clon	ne: polyclonal Ig		
Antibody Format: Ig	G whole molecule	Concentration:	1.0 mg/mL by UV absorbance at 280 nm		
		Conjugation:	ATTO 488		
		Maximum Excitation / Er	nission :500 nm / 520 nm		
Specificity	I				
Target Species:	Mouse	Immunogen:	Mouse IgG3 heavy chain		
Antibody Specificity:	lgG3 (lgG Fc gamma 3)	Anti-MOUSE IgG3 (Gamma 3 chain) Antibody was prepared from monospecific antiserum by immunoaffinity chromatography using antigens coupled to agarose beads followed by solid phase adsorption(s to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Mouse Serum and Mouse IgG3. No reaction was observed against Bovine, Human, and Rabbit Serum Proteins. Specificity was confirmed by ELISA at less than 1 of target signal.			
		resulted in a single precip and Mouse IgG3. No read Rabbit Serum Proteins. S	itin arc against anti-Goat Serum, Mouse Serum ction was observed against Bovine, Human, and

Product Datasheet / Instruction for use

Application: FLISA, Flow Cytometry, Immunofluorescence, Western Blot

Dilution: FLISA >1:20.000, Flow cytometry 1:500 - 1:2,500, Immunofluorescence >1:5,000, Western Blot (WB) 1:4.000 - 1:20.000

Application Note:

Mouse IgG3 secondary antibody is available in a variety of formats. ATTO 488 Conjugated antibodies are designed for STED microscopy, FRET, immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this ATTO conjugate matches the principle output wavelengths of most common fluorescence instrumentation.

Background Information

Anti-Mouse IgG3 ATTO 488 Antibody generated in goat detects reactivity to Mouse IgG3 (Gamma 3 chain). Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. IgG3 comprises almost 10% of the IgG subclass and has a high affinity for binding to the Fc receptor of phagocytic cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
