

Product Datasheet / Instruction for use

Goat F(ab')2 anti-Mouse IgM (μ)-FITC, MinX none

General Information

Catalog Number: SE	C-183785	Physical State:	Lyophilized		
Quantity:	1 mg	Reconstitution Volume:	1.0 mL		
		Reconstitution Buffer:	Restore with deionized water (or equivalent)		
		Shipping Conditions:	at room temperature		
		Product Expiration	Expiration date is one (1) year from date of opening.		
Antibody Host / Forn	nat				
Host Species: Go	pat	Clonality / Isotype / Clon	ne: polyclonal Ig		
Antibody Format: IgG	G F(ab')2 Fragment	Concentration:	1.0 mg/mL by UV absorbance at 280 nm		
		Conjugation:	FITC (Fluoresceinisothiocyanat)		
		Maximum Excitation / Emission: 492 nm / 520 nm			
Specificity					
Target Species:	Mouse	Immunogen:	Mouse IgM whole molecule		
Antibody Specificity:	lgM (μ-Chain/ Fc Fragment)	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Mouse IgM coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay b immunoelectrophoresis resulted in a single precipitin arc against anti- Fluorescein, anti-Goat Serum, Mouse IgM and Mouse Serum. No reacti was observed against anti-Pepsin or anti-Goat IgG F(c). No reaction was observed against other mouse heavy or light chain proteins.

Product Datasheet / Instruction for use

Application: FLISA, Flow Cytometry, Immunofluorescence

FLISA 1:10.000 - 1:50.000, Flow cytometry 1:500 - 1:2,500, Immunofluorescence 1:1,000 - 1:5,000 Dilution:

Application Note:

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.

Background Information

F(ab')2 Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)2 fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)2 fragments penetrate tissue samples and show better antigen recognition and signal generation in IHC. F(ab)2 fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')2 Anti-Mouse IgM Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.

Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
