

Product Information

Catalog Number:	GtxHa-003-D
Product:	Goat anti-Hamster IgG (H&L), Affinity Pure
Physical State:	Clear, colorless liquid, 0.2 µm filtered
Size:	1.0 mg
Antibody Concentration:	8-12 mg/ml (concentration lot dependent)
Suggested Dilution Range:	10 - 20 µg/ml for most applications The optimal working dilution should be determined by the investigator.
Buffer:	10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Stabilizer:	none
Preservative:	0.05% (w/v) Sodium Azide
Purification:	Affinity purified using solid phase Hamster IgG
Purity:	> 90% based on SDS-PAGE Small amounts of intact IgG may be present.
Antibody Specificity:	Heavy (Gamma) chains on Hamster IgG and light chains on all Hamster Immunoglobulins No reactivity to non-immunoglobulin hamster serum proteins
Reconstitution and Storage:	Store at 2-8 °C. Product is stable for up to 1 year from date of receipt. Prepare working dilution prior to use and then discard.
Safety Information:	Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. The antibody contains 0.05% sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion.

Note: This information sheet contains general product information only. For detailed lot specific information consult the vial label and the data sheet supplied by the manufacturer upon delivery of the product.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
