## Certificate of Analysis

| Product: | Rabbit Monoclonal Antibody |
| :---: | :---: |
|  | Anti-Human IgE Rabbit Monoclonal Antibody, Clone RM122 |
| Catalog No.: | 31-1024-00 |
| Lot No.: |  |
| Clone | RM122 |
| Specificity | This antibody reacts to human $\operatorname{IgE}$. No cross reactivity with human $\lg G, \lg M, \lg D$, or $\lg A$. |
| Application: | ELISA, Immunohistochemistry, Immunocytochemistry, Flow Cytometry. |
| Immunogen: | Human IgE |
| Purity: | Protein A affinity purified from an animal origin-free culture supernatant |
| Size: | $100 \mu \mathrm{~g}$ |
| Concentration: | $1.0 \mathrm{mg} / \mathrm{mL}$ |
| Buffer: | $50 \%$ Glycerol/PBS with $1 \%$ BSA and $0.09 \%$ sodium azide |
| Usage: | $\begin{aligned} & \text { ELISA: } 10 \mathrm{ng} / \mathrm{well}-100 \mathrm{ng} / \mathrm{well} \text { (for Capture); } \\ & 0.01 \mathrm{ug} / \mathrm{mL}-0.1 \mathrm{ug} / \mathrm{mL} \text { (for Detection); } \\ & \mathrm{IHC}, \mathrm{ICC}: 0.5 \mathrm{ug} / \mathrm{mL}-2 \mathrm{ug} / \mathrm{mL} \text {; } \end{aligned}$ |
| Storage and Stability: | Stable for 1 Year at $-20.0^{\circ} \mathrm{C}$ from date of receipt. |
| Country of Origin: | U.S.A. |

## Intended Use: <br> For Research Use Only Not for Diagnostic or

## Therapeutic Use

Sandwich ELISA using RM122 as the capture antibody ( $25 \mathrm{ng} /$ well), and Biotinylated antihuman light chains ( $\kappa+\lambda$ ) antibody RM129 as the detection antibody, followed by an alkaline phosphatase conjugated streptavidin.

ELISA of human immunoglobulins shows RM122 reacts to both IgE $\lambda$ from human myeloma and $\operatorname{lgE}$ from human plasma. No cross reactivity with human $\lg G, \lg \mathrm{M}, \operatorname{lgD}$, or $\lg$. The plate was coated with $50 \mathrm{ng} /$ well of different immunoglobulins. $200 \mathrm{ng} / \mathrm{mL}, 50 \mathrm{ng} / \mathrm{mL}$, or 10 $\mathrm{ng} / \mathrm{mL}$ of RM122 was used as the primary antibody. An alkaline phosphatase conjugated anti-rabbit $\lg G$ as the secondary antibody.

A titer ELISA using RM122. The plate was coated with different amounts of human IgE (from plasma). A serial dilution of RM122 was used as the primary antibody. An alkaline phosphatase conjugated anti-rabbit $\lg G$ as the secondary antibody.
