

Goat IgG anti-Human IgG (H+L)-FITC, MinX Bo,Ck,Go,Gp,Hm,Ho,Ms,Rb,Rt,Sh

General Information

Catalog Number: S	SEC-182991	Physical State:	Lyophilized	
Quantity:	1 mg	Reconstitution Volume:	1.0 mL	
		Reconstitution Buffer:	Restore with deionized water (or equivalent)	
		Shipping Conditions:	at room temperature	
		Product Expiration	Expiration date is one (1) year from date of opening.	
Antibody Host / For	rmat			
Host Species:	Goat	Clonality / Isotype / Clon	ne: polyclonal Ig	
Antibody Format:	gG whole molecule	Concentration:	1.0 mg/mL by UV absorbance at 280 nn	
		Conjugation:	FITC (Fluoresceinisothiocyanat)	
		Maximum Excitation / Emission: 492 nm / 520 nm		
Specificity	I			
Target Species:	Human	Immunogen:	Human IgG whole molecule	
Antibody Specificity: IgG (H+L)		Secondary Antibodies are prepared from monospecific antiserum by immunoaffinity chromatography using Human IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-Goat Serum, Human IgG and Human Serum. No reaction was observed against Bovine, Chicken, Goa Guinea Pig, Hamster, Horse, Mouse, Rabbit, Rat and Sheep Serum Proteins.		
		beads followed by solid p reactivities. Assay by im- precipitin arc against anti Human Serum. No reacti Guinea Pig, Hamster, Hor	bgraphy using Human IgG coupled to agarose hase adsorption(s) to remove any unwanted munoelectrophoresis resulted in a single -Fluorescein, anti-Goat Serum, Human IgG and on was observed against Bovine, Chicken, Goat	
		beads followed by solid p reactivities. Assay by imp precipitin arc against anti Human Serum. No reacti Guinea Pig, Hamster, Hor Proteins. Minimal Cross Reactivity	bgraphy using Human IgG coupled to agarose hase adsorption(s) to remove any unwanted munoelectrophoresis resulted in a single -Fluorescein, anti-Goat Serum, Human IgG and on was observed against Bovine, Chicken, Goat	
Formulation, Trans	port and Storage	beads followed by solid p reactivities. Assay by imp precipitin arc against anti Human Serum. No reacti Guinea Pig, Hamster, Hor Proteins. Minimal Cross Reactivity	bgraphy using Human IgG coupled to agarose hase adsorption(s) to remove any unwanted munoelectrophoresis resulted in a single -Fluorescein, anti-Goat Serum, Human IgG and on was observed against Bovine, Chicken, Goat se, Mouse, Rabbit, Rat and Sheep Serum : Bovine, Chicken, Goat, Guinea Pig, Hamster	
Storage Buffer:0.02Phosphate,0.15 M SoStabilizer:10 m	M Potassium dium Chloride, pH 7.2 ng/mL Bovine Serum	beads followed by solid p reactivities. Assay by imp precipitin arc against anti Human Serum. No reacti Guinea Pig, Hamster, Hor Proteins. Minimal Cross Reactivity generally, Horse, Store Secondary Antibody extended storage aliquot below. Avoid cycles of free	bgraphy using Human IgG coupled to agarose hase adsorption(s) to remove any unwanted munoelectrophoresis resulted in a single -Fluorescein, anti-Goat Serum, Human IgG and on was observed against Bovine, Chicken, Goat se, Mouse, Rabbit, Rat and Sheep Serum : Bovine, Chicken, Goat, Guinea Pig, Hamster	
Storage Buffer:0.02Phosphate,0.15 M SoStabilizer:10 m	M Potassium dium Chloride, pH 7.2	beads followed by solid p reactivities. Assay by im- precipitin arc against anti Human Serum. No reacti Guinea Pig, Hamster, Hor Proteins. Minimal Cross Reactivity generally, Horse, Store Secondary Antibody extended storage aliquot below. Avoid cycles of fro completely clear after sta	y Conjugate at 4° C prior to restoration. For secondary antibody and freeze at -20° C or eezing and thawing. Centrifuge product if not	

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.

Product Datasheet / Instruction for use

Application Recommendation

Application: FLISA, Flow Cytometry, Immunofluorescence

Dilution: FLISA 1:10.000 - 1:50.000, Flow cytometry 1:500 - 1:2,500, Immunofluorescence 1:1,000 - 1:5,000

Application Note:

Secondary antibodies aid in the detection or sorting of target antigens by binding to the primary antibody. Anti-Human IgG (H&L) Fluorescein antibody is ideal for Flow Cytometry, Immunofluorescence Microscopy as well as other antibody detection methods where highly cross adsorbed (Pre Adsorbed) methods are required.

Background Information

Anti-Human IgG (H&L) Fluorescein generated in goat detects human Immunoglobulin G (IgG), both heavy and light chains of the antibody molecule are present. It is a protein complex composed of four peptide chains — two identical heavy chains and two identical light chains arranged in a Y-shape typical of antibody monomers. Each IgG has two antigen binding sites. Representing approximately 75% of serum immunoglobulins in humans, IgG is the most abundant antibody isotype found in the circulation. IgG molecules are synthesized and secreted by plasma B cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
