

Product Datasheet / Instruction for use

# Goat IgG anti-Mouse IgG (H+L)-Biotin, MinX Hu

## **General Information**

Catalog Number: SEC-183230	Physical State:	Lyophilized		
Quantity: 2 mg	Reconstitution Volume:	1.0 mL		
	Reconstitution Buffer:	Restore with deionized water (or equivalent)		
	Shipping Conditions:	at room temperature		
	Product Expiration	Expiration date is one (1) year from date of opening.		
Antibody Host / Format				
Host Species: Goat	Clonality / Isotype / Clon	ne: polyclonal Ig		
Antibody Format: IgG whole molecule	Concentration:	2.0 mg/mL by UV absorbance at 280 nr		
	Conjugation:	Biotin		
	Maximum Excitation / Er	Maximum Excitation / Emission: /		
Specificity	I			
Target Species: Mouse	Immunogen:	Mouse IgG whole molecule		
Antibody Specificity: IgG (H+L)	Anti Mouse IgG antibody conjugated to biotin was prepared from monospecific antiserum by immunoaffinity chromatography using Mou IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti-Goat Serum, Mouse IgG and Mouse Serum. No reaction was observed against Huma Serum Proteins. Specificity was confirmed by ELISA at less than 1.0% cross reactivity against human IgG.			
	monospecific antiserum H IgG coupled to agarose b remove any unwanted re resulted in a single precip Mouse IgG and Mouse Se Serum Proteins. Specifici	by immunoaffinity chromatography using Mous eads followed by solid phase adsorption(s) to eactivities. Assay by immunoelectrophoresis bitin arc against anti-biotin, anti-Goat Serum, erum. No reaction was observed against Human ity was confirmed by ELISA at less than 1.0%

#### Product Datasheet / Instruction for use

Application: ELISA, Immunohistochemistry (IHC), Immunohistochemistry (Paraffin-embedded Sections), Immunohistochemistry (frozen sections), Western Blot

**Dilution:** ELISA 1:550.000, Immunohistochemistry (IHC) 1:1,000 - 1:5,000, Western Blot (WB) 1:2.000 - 1:10.000

#### **Application Note:**

Mouse secondary antibody conjugated to Biotin is available in a variety of formats. Anti IgG secondary antibody conjugated is suitable for ELISA, Immunohistochemistry western blotting as well as other anti mouse antibody based assays.

#### **Background Information**

Anti-Mouse IgG Biotin Antibody generated in goat detects reactivity to Mouse IgG. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

### Safety Information

This reagent contains sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.

#### Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
