

Product Datasheet / Instruction for use

Rabbit IgG anti-Mouse IgA-HRPO, MinX none

General Information

Catalog Number: SEC-183269	Physical State:	Lyophilized				
Quantity: 1 mg	Reconstitution Volume:	1.0 mL				
	Reconstitution Buffer:	Restore with deionized water (or equivalent) at room temperature Expiration date is one (1) year from date of opening.				
	Shipping Conditions:					
	Product Expiration					
Antibody Host / Format	 					
Host Species: Rabbit	Clonality / Isotype / Clor	ne: polyclonal Ig				
Antibody Format: IgG whole molecule	Concentration:	1.0 mg/mL by UV absorbance at 280 nn				
	Conjugation:	Horseradish Peroxidase (HRP)				
	Maximum Excitation / E	Maximum Excitation / Emission: /				
Specificity	I					
Target Species: Mouse Antibody Specificity: IgA (Alpha-Kette Fc-Fragment)	Immunogen: /	Anti-Mouse IgA alpha heavy chain antibody w produced by repeated immunization with Mouse IgA alpha heavy chain in rabbit.				
	immunoaffinity chromate beads followed by solid p reactivities. Assay by im	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Mouse IgA coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Rabbit Serum, Mouse IgA, ar Mouse Serum. Specificity was confirmed by ELISA at less than 1% cross reactivity against other mouse heavy and light chain isotypes.				
	Mouse Serum. Specificit	y was confirmed by ELISA at less than 1% cross				
	Mouse Serum. Specificit	y was confirmed by ELISA at less than 1% cross nouse heavy and light chain isotypes.

Product Datasheet / Instruction for use

Application: ELISA, Immunohistochemistry (IHC), Immunohistochemistry (Paraffin-embedded Sections), Immunohistochemistry (frozen sections), Western Blot

Dilution: ELISA 1:200.000, Immunohistochemistry (IHC) 1:1,000 - 1:5,000, Western Blot (WB) 1:2.000 - 1:10.000

Application Note:

Anti-Mouse IgA alpha heavy chain antibody is suitable for highly specific immunological methods requiring extremely low background levels, lot-to-lot consistency, high titer and specificity.

Background Information

Anti-Mouse IgA alpha heavy chain antibody generated in rabbit detects specifically Mouse IgA alpha heavy chain. This secondary antibody anti-Mouse is ideal for investigators who routinely perform titration assays, western-blot, immunoprecipitation and more generally immunoassays.

Safety Information

This reagent contains Thimerosal (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Standard Laboratory Practices should be followed when handling this material.DO NOT ADD SODIUM AZIDE! Use of Sodium Azide as a preservative will substantially inhibit the enzyme activity of horseradish peroxidase!

Disclaimer

This product is warranted to perform in conformance with product specifications and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to one year from date of shipment when the product is subjected to normal, proper and intended usage. Buyer's exclusive remedy for non-conforming products during the warranty period is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or disaster or inappropriate use of the products in a manner for which they were not designed, or improper storage and handling of the products.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.
