

Anti-Rat IgG1 (MARG1-5)

Mouse Monoclonal Antibody

Cat. No.	Conjugate	Unit Size
MARG1-5-P-0.1	purified	100µl
MARG1-5-P-0.5	purified	500µl
MARG1-5-P-1	purified	1ml

Product Information

Supplied as:	1 mg/ml affinity purified antibody prepared in PBS buffer, pH 7.6, with 0.09% sodium azide as preservative
Origin:	Hybridoma derived by hybridization of spleen cells from immunized mice with the Sp2/O mouse myeloma cell line.
Immunogen:	IgG1 (IR27, IR31) (1) (2)
Clone:	MARG1-5
Host / Isotype:	Mousekappa IgG1
Reactivity:	Rat gamma 1 heavy chain of immunoglobulin (determined by immunodot) (2) The specificity of MAbs anti-IgG subclasses is determined in a range of optimal concentrations. Increasing the primary or secondary antibody at a higher concentration than necessary c
Cross-Reactivity:	not determined
Avidity:	not determined
Applications:	ELISA
Storage and Stability:	For longterm storage store product at -20°C. At 2-8°C the undiluted stock solution of the antibody is stable for a few weeks. Repeated freezing and thawing of unconjugated antibody should be avoided. It is recommended to aliquot unconjugated antibody before freezing. Labelled antibodies (Peroxidase, FITC, Biotin) contain 50% glycerol as antifreezing and remain liquid at -20°C. In this case aliquoting is not required. It's recommended to prepare a working dilution fresh prior to use. Expiry information is given on the label and / or data sheet supplied upon delivery

Anti-Rat IgG1 (MARG1-5)

Mouse Monoclonal Antibody

Safety Information: Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. Purified, FITC, and Biotin labelled antibody contains 0.09% sodium azide (a poisonous and hazardous substance) as preservative. Although this concentration is not regarded as dangerous to health, appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. Peroxidase conjugate contains no hazardous constituents.

Note: This information sheet contains general product information only. For detailed lot specific information consult the label and data sheet supplied by the manufacturer upon delivery of the product.

This product is for In Vitro experimental use only. Not for Therapeutic or Diagnostic use.

This product is warranted to perform in conformance with the product specifications provided by the manufacturer and to be free from defects in material and workmanship. Products are supplied for research use only. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated, this warranty is limited to the period of stability as indicated on the label and / or data sheet at the time of delivery of the product when the product is subjected to normal, proper and intended usage. The remedy for non-conforming products is limited to replacement of or refund for the non-conforming product(s). There is no obligation to replace products as the result of accident or inappropriate use, improper storage or handling of the products.
